## Road Hearing Procedures

The Grand County Road Hearings are held annually on the second Tuesday in September by BOCC Resolution at the Grand County Courthouse in the Board of County Commissioners Meeting room.

- 1) The hearing is held to request the following for consideration by the Board of County Commissioners for approval:
  - a. Maintenance on an existing dedicated county road
  - b. To increase/decrease the level of existing road maintenance on a dedicated county road
  - c. Acceptance of a dedicated county road after the two year warranty period
- 2) The hearing is held to request for approval, the following year official road maps.

**Road vacations are a separate matter and will not be considered at this hearing**

**Right-of-Way issues are a separate matter and will not be considered at this hearing**

The following will be required for the Board of County Commissioners to consider for maintenance:

An application for County maintenance requires a letter of interest for County Maintenance, signed by all people having ownership interest in the road, requesting consideration by the Board of County Commissioners. The letter must be submitted to the County on or before the date specified in the legal notice published in all of Grand County's Papers, for consideration at the annual road hearings, to be held in September. The County will not consider acceptance of roads for maintenance until Final Acceptance has been granted, after the two (2) year warranty period has been satisfied. The Board of County Commissioners shall base their decision upon recommendation from the County Road Superintendent, Director of Planning and Zoning and the County Engineer that the roadways have met the following minimum requirements:

- 1) Roads have been constructed according to County regulations and standards.
- 2) All drainage criteria as outlined in the County regulations and standards have been satisfied.
- 3) Proper easement for drainage requirements and pedestrian movements, both offsite and onsite have been identified and are shown on the plans.
- 4) The included roads are properly connected to the existing County road system.
- 5) All necessary road Right-of-Ways have been dedicated to Grand County.
- 6) All combustible or objectionable material is cleared from the roadside and all required signing is properly installed. All areas requiring seeding and/or foliage producing the proper stand prescribed by the plan.

NOTE: Acceptance of platted developments by the County does not constitute acceptance of the roads and Right-of-Ways for maintenance. Until each road is specifically accepted for maintenance by the Board of County Commissioners at the annual road hearings, maintenance and construction repair are the responsibility of the owners of the land within the development.
