Special Instructions: Colorado requires that Tier II reports be filed using EPA's Tier2 Submit software and submitted to the Colorado Department of Public Health and Environment (CDPHE). Colorado has developed a platform, Colorado Environmental Online Services (CEOS), to handle a variety of environmental reporting requirements. Effective for reporting year 2018 (calendar year 2019) forward, Tier II reporting must occur through CEOS. CEOS will accept only validated T2S files. Visit CDPHE's [Tier II](#) EXIT webpage for detailed instructions. Emailed reports will not be accepted. You can find more information on CEOS here: https://ceos.colorado.gov/CO/CEOS/Public/Client/CO_CIMPLE/Shared/Pages/Main/Login.aspx

Colorado has instituted a single-point submission process for Tier II reporting. Facilities are not required to provide the same report to the local emergency planning committee (LEPC) or the local fire department unless those agencies maintain local reporting requirements. Please check with your LEPC and fire district to determine if direct Tier II reporting to their agency is required. Tier II data submitted to the state will be distributed to the LEPCs and local fire districts.

Colorado has instituted several state-specific Tier2 Submit requirements. These requirements are found under the "State Field" tab in Tier2 Submit. Please see Colorado's [Tier II](#) EXIT webpage for information.
