

Drinking Water Safety

Contaminated water doesn't always taste or smell bad but it can still make you sick. See additional information about well testing and repair resources.

Food Safety

Sanitation and hygiene are important to prevent foodborne illness after wildfire. Discard any perishable food remaining in your home (anything in your refrigerator and freezer). Wash your hands frequently.

Pest Control

Take steps to prevent mosquitoes, rodents, and other pests around your home by securing waste in insect/rodent proof containers.

Additional information and resources listed on the reverse

Injury Prevention and Wounds

Take precautions to prevent physical and heat injury. Use care when navigating your home and surrounding areas. Be aware of the heat and stay hydrated. Make sure you are up to date on vaccinations.

Septic and Sewage

Above and under ground elements of your system may have been damaged by heat or fire. Have your septic systems inspected and repaired by a qualified contractor.

Respiratory Health

Air quality may continue to be poor following the fire. If you have lung, heart, or other health problems, avoid heavy activity and exercise and pay attention to air quality alerts.
